Haldex - ADV

41010019.....\$115.25

CONSEP®

41210026.....\$189.35

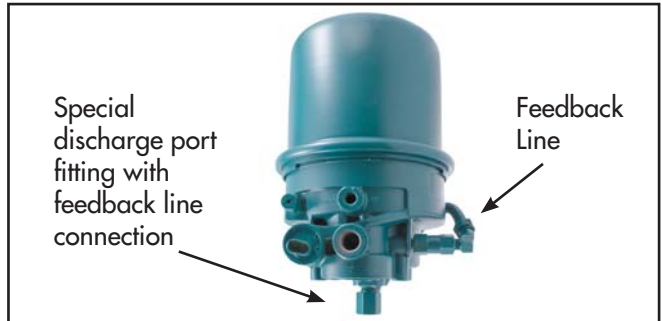

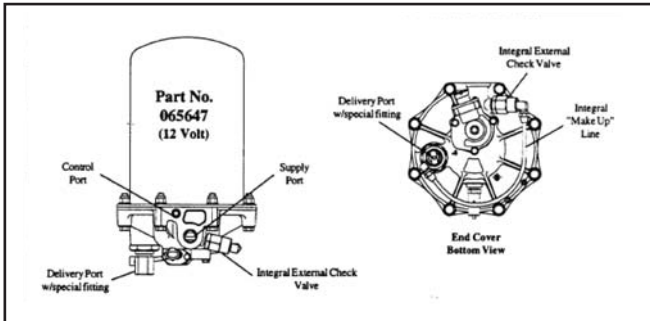

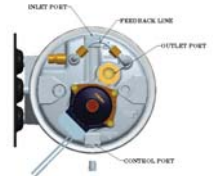

- Removes oil, liquid & other contaminants prior to passage into the Air Dryer & Air System
- Substantially increases air dryer cartridge life
- Reduces corrosion and possible failure of air systems components such as valves etc.

TECH TIPS

Cummins/Holset E TYPE Compressors Requires a SPECIAL AIR DRYER or Drop in Style

The E Type Compressor requires air pressure redirected to the head when the governor cuts out or in the unloaded mode, if the wrong Air Dryer is used, excessive oil passage may occur causing premature component failures.

- Refer to the part number on the compressor, if there is a QE or E make sure you replace the proper Air Dryer

- Refer to the part number on the Air Dryer, these dryers look very similar, but in most cases an additional line is added that can be seen.
